## COMPANY PROFILE

**BMMJ**  
OIL COLLECTORS  
USED OIL COLLECTORS

*Company Vision: "To promote the safety of our environment by safely collecting and disposing of used oil at competitive prices coupled with efficient service."*

A photograph of an industrial facility, likely a refinery or chemical plant, at night. The scene is illuminated by numerous bright lights, creating a high-contrast image with dark silhouettes of structures and bright, glowing areas. The lights are scattered across the facility, highlighting various towers, pipes, and storage tanks. The overall atmosphere is one of intense industrial activity.

# About Us

## Company History:

BMMJ is a small company committed to safe and sound environmental management. The business was established in 2016, started by 4 sisters and 1 experienced used oil collection partner in the industry. We saw the need in our communities to dispose of used oil safely to support the fight against global warming and lend a hand in promoting and taking care of our environment for our future generations. We realised that in our communities there are several informal vehicle repair shops and mechanics that were not informed or aware of how to safely dispose of the used oil they generated.

We therefore embarked on a journey to supply them with containers, 210L drums to decant used oil into for us to collect and safely dispose of once full. We also service our mines and car dealerships around the country by safely collecting and safely disposing of used oil. By managing the process of delivering containers and tracking their volumes for collection at competitive prices we save our clients their time and money to manage more important day to day business matters without worrying about the waste they generate and this becomes a win- win situation for both parties. We saw the need in our communities to dispose of used oil safely to support the fight against global warming and lend a hand in promoting and taking care of our environment for our future generations.

# Our Vision

## **Business Goals and Objectives:**

To offer efficient services to our clients by continually safely collecting used oil and safely disposing of it as per the waste management procedures in ensuring that our environment is preserved for our future generations.

To create value service for our clients by saving them time in managing their waste product management for them by providing marked drums for safe decanting and tracking the levels of oil to ensure timeous collections and in so doing giving back the time to our clients to concentrate on important business matters. We aim to collect over 2 million Litres of used oil per annum in ensuring our continued positive impact on the environment.

## **Growth Strategy:**

Collecting as much used oil as possible by providing superior service to our clients that add value by not only collecting the oil but also saving them money by paying them competitive prices to dispose of their oil and also by giving them the time back by managing their waste from delivering containers for decanting to managing the volumes to collecting once full and safely disposing of the waste as per the waste management requirements to ISO 14001 certified recyclers or HFO producers and to allocated disposal sites.

## **Company Vision:**

To promote the safety of our environment by safely collecting and disposing of used oil at competitive prices coupled with efficient service.

## **Company Mission:**

To reach over 5 million litres of used oil collection by ensuring efficiency in safety and in the handling and collection of used oil while making sure that the oil is safely transported without spillage and delivered safely to its destination to ensure that we always safeguard our environment and preserve it for our future generations in everything we do.

# Services

## **Here is the list of services that we provide:**

- We collect used oil and deliver it to recyclers or manufactures.
- We also offer drums for clients to decant used oil in ready for collection.

## **Business Competitiveness:**

Offer a value- added collection service with containers provided to customers to decant oil for collection. Track the levels of oil ready for collection. Collect and dispose of used oil safely every-time and offer safe certificate. We are overseen and audited by NORA-SA and make data reports available as an additional requirement of the Waste Act. Part of the rose foundation.

## **Our Location:**

We are situated in the Westrand and service clients around the country. If you have oil or in need of oil and are in South Africa, we will reach you.

## **Portfolio of Clients Assisted:**

Aveng
